We, the undersigned, applaud the White House and the Office of National AIDS Policy (ONAP) for the National HIV/AIDS Strategy and the initiation of the 12 Cities Project. However, there is an urgent need to initiate the next steps towards eradicating HIV/AIDS.

The evidence is clear: The Southeast has the highest rates of both new HIV diagnoses and HIV deaths, as well as poor social determinants of health. We therefore request that resources be targeted to develop models of integrated HIV/AIDS prevention, care and treatment for rural, midsize, and urban communities typical of those in the Southeastern region of the United States.
